## OCCUPATIONAL GROUP LISTING OF TITLES

This section presents the schematic code structure used by the State of North Carolina and a listing of classification titles by assigned code. The assignment of classifications to occupational groups is based on the nature of work, educational requirements, and the required knowledge and skills. The code structure allows the user to view classifications with similar work characteristics and recruitment requirements.

The work recognized in some classifications may reflect elements that are associated with several different occupational groups. In these cases, the classes are assigned to the occupational group which best represents the dominant characteristics used in determining recruitment standards and identifying an appropriate salary range.

The schematic code consists of five digits that are used to indicate the major and minor occupational groups and the specific class or class series. The first digit is zero for all the current schematic codes. The second and third numbers identify the major and minor occupational group. Usually, minor groupings are assigned a block of one hundred numbers such as:

**00400 Clerical – Office Management Occupational Group**  
**00600 Purchasing and Related Classes**  
**00700 Accounting and Auditing**

The fourth and fifth digits usually indicate the various individual classes and class series found within the minor group. For example, in the 00400, Clerical – Office Management Occupational Group, there are three levels of Administrative Secretary recognized and assigned the following codes:

**00427 Administrative Secretary I**  
**00428 Administrative Secretary II**  
**00429 Administrative Secretary III**

The codes assigned to a classification series typically run sequentially. However, this is not always the case. The user should cross-reference this information with the alphabetic listing to ensure that all levels within a class series are identified.

Schematic codes are also an integral part of the Personnel Management Information System (PMIS). Personnel transactions require input of the assigned code, and PMIS generates a variety of reports using these codes.

## EXPLANATION OF SCHEMATIC CODES

Schematic codes, which group classes based on required knowledge and skills, educational requirements, and similarity of work, have been assigned to each class. These codes are designed to assist classifiers in identifying related classes and to assist managers in planning for and designing new or revised positions. The schematic system, outlined on the following pages, divides classes into twelve major occupational groups. Within each of these major groups, classes are further divided into minor occupation groups. Please note that some classes are difficult to categorize as they contain elements found in several occupational groups. These classes have been assigned to the occupational group which best represents them.

<b>CODE NUMBERS</b>	<b>OCCUPATIONAL CATEGORIES</b>	<b>PAGE NUMBERS</b>
